

Title of the project: Education&Economy& Hand in Hand

Reference number of the project: 2017-1-DE03-KA219-035531

Evaluation of the project meeting (Activity C1) November 26 – 1st December 2017, Niedzica, Poland

In Poland was our first meeting with all the countrys, except Austria.

The results of our evaluation:

- The cooperation with all partners during the meeting was rated excellent
- the communication with the partners in English was without any problems
- The given information about the other nations' school organization and the economic situation in the participants' regions were rated absolutely satisfying and especially the visit of the power station in Niedzica as a regional example was welcome
- In general the work as a team was rated as mediocre. The prominent reason consisted of the language difficulties resulting from German as only language for Mebis; therefore Mebis was seen as very difficult. This could also have been avoided by the providing of a multilingual manual.
- The meeting goals in general were accomplished, so say most of the evaluators. The only exception was the usage of Mebis.
- The cultural part of the meeting was commonly rated as excellent and very informative
- The organization was great and there was enough free time
